CME Credits

This activity has been planned and implemented in accordance with the Essentials and Standards of the Accreditation Council for Continuing and Medical Education through the Joint Sponsorship of the American Society of Anesthesiologists and the American Society of Critical Care Anesthesiologist. The American Society of Anesthesiologists is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians.

The American Society of Anesthesiologists designates this educational activity for a maximum of 7 *AMA PRA Category 1 Credit(s)*[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Learning Objectives

- To present an update on activities and efforts undertaken by the American Society of Critical Care Anesthesiologists and the American Society of Anesthesiologists.
- To present current basic and clinical research relevant to the art and science of critical care anesthesia.
- To review the state of the current understanding of the complications of transfusion and their treatment.
- To discuss the management of ventilation during and after CPR events, and how it can alter physiology and recovery.
- To compare the information provided by the combination of central venous pressure monitoring and echocardiography to that obtained with a pulmonary artery catheter, and to review how this information can be used to manage patients with unstable circulations.
- To understand what the future of medical accident investigation is, and how it will help shape critical care in the future.
- To review the physiology of inflammation as it relates to lung injury, and the modulators that are presently believed to drive injury in a variety of clinically important lung injuries.
- To review the results from the various ARDSnet protocols that have closed, and to review the status of ongoing ARDSnet studies, and to discuss their application to clinical practice.
- To learn from a critical care lifetime achievement award recipient about state-of-the-art critical care anesthesia.
- To discuss the scientific and clinical importance of posters presented at the meeting with acknowledged clinical leaders in critical care.
- To debate the role of the inflammatory response and its modulation in critical illness.
